

Shadow in black

Top layer in green/black

The black version is the original picture found at <http://www.clker.com/clipart-23379.html> The blue version is the same picture but deliberately 'squished' to make the shadow more dominate.

The shadow was done with black Finca and the leave and nuts using Black Finca for the passives with a variegated green/yellow linen for the weavers.

I am not happy with the way I finished the gumnuts so will need to do more lace that requires neat finishing.
